

Rear modules application chart

Video interface

Up and down conversion: Up/down/cross converters

UP-DOWN-A-VF
12.5 Watts

UP-DOWN-ATX-VF
12.5 Watts

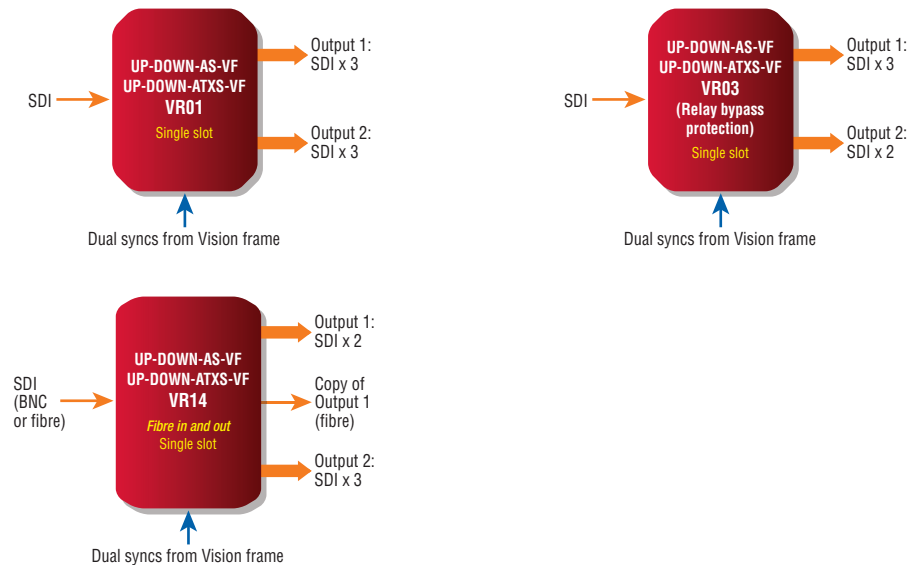

NB. Select FIP-VF option for fibre in, FOP-VF option for fibre out and FIO-VF option for fibre in and out

Up and down conversion: Synchronising up/down/cross converters

UP-DOWN-AS-VF
12.5 Watts

UP-DOWN-ATXS-VF
12.5 Watts

NB. Select FIP-VF option for fibre in, FOP-VF option for fibre out and FIO-VF option for fibre in and out

Video interface

Video over IP: IP gateways

SDI6-IP-VF
Watts TBA

IP-SDI6-VF
Watts TBA

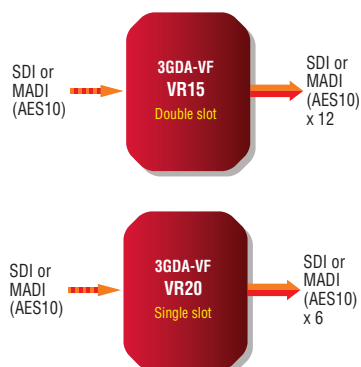

IP-IP-VF
Watts TBA

Video distribution: Digital video distribution amplifier (SDI, ASI, HD and 3Gb/s)

3GDA-VF
8 Watts

Video distribution: Analogue video distribution amplifier

VDA-VF
5 Watts

Rear modules application chart

Video interface

Synchronisation: Video synchroniser

SYNNER-VF
10 Watts

NB. Select FIP-VF option for fibre in, FOP-VF option for fibre out and FIO-VF option for fibre in and out

NB. Select FIP-VF option for fibre in, FOP-VF option for fibre out and FIO-VF option for fibre in and out

Fibre optics: Fibre optic transmitters and receivers

FTX-VF
5 Watts

FRX-VF
5 Watts

Rear modules application chart

Audio interface

Audio embedding and de-embedding: Embedder/de-embedder

TANDEM10-VF
10 Watts

NB. Select FIP-VF option for fibre in, FOP-VF option for fibre out and FIO-VF option for fibre in and out

NB. Select FIP-VF option for fibre in, FOP-VF option for fibre out and FIO-VF option for fibre in and out

Audio distribution: Digital audio distribution amplifier

DADA-VF
5 Watts

NB. Can be configured so all outputs come from a single input

Audio distribution: MADI audio distribution amplifier

3GDA-VF
8 Watts

Rear modules application chart

Audio interface

Audio distribution: Analogue audio distribution amplifier

AADA-VF
10 Watts

NB. Can have 8 outputs of channel 1 mono
